DevOps & Cloud: Git, Docker, CI/CD, DigitalOcean, Alibaba, Laravel Forge, Vercel, Railway

Integrations: Payment Gateways (Moyasar), Insurance (Nphies via Waseel), Accounting (Qoyod)

Architecture: SaaS Architecture, Modular Design, Scalable APIs

Practices: Agile, TDD, Unit Testing, Clean Code

Professional Experience

National E-Learning Center (NELC) Via Smart Solutions, Riyadh, SA - Backend Developer

June 2025 - Dec 2025 (Contract)

- Developed and maintained backend services for certificate issuance, validation, and lifecycle management.
- Built RESTful APIs and optimized database models, improving system reliability and performance.
- Designed an AI-driven SkillGap pipeline enabling automated objective generation with localized outputs.
- Enhanced notification and email systems, improving delivery reliability and system observability.

Elmam, Riyadh, SA - Full Stack Developer

Nov 2023 – June 2025 (Full-time) / June 2025 – Feb 2026 (Part-time - Remote)

- Developed a healthcare SaaS platform serving 10,000+ patients and 50+ medical professionals.
- Integrated Moyasar payments, reducing transaction failures by 25% and handling 2,000+ monthly payments.
- Automated 90% of insurance claims via Nphies integration, cutting manual processing time by 60%.
- Connected Qoyod accounting APIs, enabling 100% invoice synchronization and improving accuracy by 40%.
- Built a dashboard and API for Fitpod, a fitness application, integrating with the OnePass platform.

Century 21 - Logis, Tunisia - Full Stack Developer

June 2021 – Dec 2023 (Remote)

- Maintained real estate CMS platforms for Tunisian clients, boosting property search efficiency by 40%.
- Built a client management system (CRUD), streamlining customer interactions and reducing manual work by 30%.
- Established team-based agent management, enhancing collaboration and data organization across 100+ agents.
- Created a property-matching system, increasing successful matches by 35%.
- Integrated external real estate platforms via APIs, reducing manual data entry by 50%.
- Added dashboard analytics, providing real-time insights and improving decision-making speed by 25%.
- FullCalendar UI for scheduling, optimizing event management, and boosting agent efficiency by 20%.
- Implemented clean code principles, resulting in a 40% reduction in response time and improved system performance.

Meraki- Full Stack Developer

December 2021 – Present (Remote)

- Crafting Tailwind CSS components supporting RTL languages.

Side Projects

Blade Preview - VS Code Extension

- Live preview of Laravel Blade templates directly in VS Code. See your designs instantly without running a server.

Arshadni - Learning Platform

- Co-developed an education platform serving 10,000+ students and 500+ mentors.
- Implemented real-time chat, task management, and coding challenges, increasing engagement by 75%.
- Designed scalable mentor-student workflows supporting high concurrency usage.

Education

Neelain University, Sudan, Khartoum - B.Sc. Information Technology
